#### FEATURES & BENEFITS

- Advanced Grid Technology
- All The Power You Need - Performance specifications exceeds OE requirements for starting applications
- Maintenance-free technology
- Vibration Protection
- Corrosion Resistant
- Premium Warranty
- Suitcase Style Handles (on most battery types)

**CDNRG.COM**

## OUR COMMERCIAL BATTERIES ARE BUILT TOUGH AND TESTED TOUGHER.

#### A FOUNDATION FOR SUPERIOR PERFORMANCE

The positive grid is the foundation on which your battery is built. This Canada Proof grid delivers life and performance superior to competitive grids

- More durable and increased corrosion resistance
- Better electrical flow for superior cranking power

#### VENTING

The single port gas channelled venting system collects and discharges gas away from posts. Gases generated from the cells are channelled along the manifold strip to the single port venting area. The gases must travel through a small maze, allowing electrolyte to drop back into the battery. This innovation significantly contributes to the battery's improved life expectancy, prevents corrosion and improves performance.

#### DESIGN BENEFITS

##### Maintenance-Free Technology

- Reduced gassing rate
- Stamped calcium positive alloy grid provides longer life and corrosion resistance
- Sodium sulfate additive improves ability to accept charge

##### Vibration Protection

- The plate's active material is infused with fiberglass\*, giving it the strength and resistance the battery needs to handle high vibration loads
- Specially designed lead alloy strap and anchor bonding provide increased stability for high-vibration applications
- Impact resistant polypropylene case with reinforced endwall design

\*Some models only

**CANADA PROOF MIXTECH BATTERIES PREVENT ACID BUILD UP FROM KILLING YOUR BATTERIES AND CAN EXTEND THEIR LIFE BY UP TO 2x.**

It's 100% maintenance-free, provides superior sustained performance, and offers the lowest total cost of ownership versus other conventional flooded batteries in the industry.

**MIXTECH: BATTERIES REMIXED**

**ASK ABOUT THE MANY NEW BATTERY OPTIONS AVAILABLE**

**CANADA PROOF MIXTECH EDITION**

CANADA PROOF MIXTECH BATTERY  
The motion of your vehicle causes the electrolyte to circulate and continuously mix preventing acid stratification.

TRADITIONAL BATTERY  
Without MIXTECH, acid in the electrolyte settles at the bottom which leads to excess corrosion and charge imbalance. This is known as acid stratification.

## INVERTER/CHARGER

**xantrex™**  
Smart choice for power™

### 1800W SINE WAVE INVERTER

#### Product Features

- » The quick-connect AC terminals on both AC input and output enables incredibly easy installation
- » Designed to power demanding loads such as microwave ovens, TVs, DVD players, small appliances and other electronic equipment
- » Multistage charging helps ensure that batteries are recharged quickly and efficiently
- » Ignition lockout feature helps to minimize battery drain
- » Detachable digital remote control panel display provides system information. (Cable included)
- » Automatic three-stage battery charger
- » Designed to be hardwired using quick-connect AC terminals or by connecting AC through GFCI receptacles (included)
- » Built-in 30-amp relay to automatically transfer between inverter power and incoming AC utility power

#### Protection Features

- » Battery over-voltage and under-voltage protection
- » Over-temperature shutdown
- » Automatic overload protection
- » Short-circuit protection
- » Ground-fault protection
- » ETL certified to UL458 for use in mobile RV, marine and commercial applications
